Wildlife Ecology

Week 11 Assignment Solutions (2026)

1 Which term refers to the total weight of organisms removed by fishing?

(a) Natural mortality

(b) Recruitment

(c) Growth

(d) **Yield to fishery**

2 Ludwig's ratchet predicts

a. decreasing harvesting rate

b. constant harvesting rate

c. **increasing harvesting rate**

d. fluctuating harvesting rate

3 A deciduous forest in Madhya Pradesh was converted to a mine. After the mining operations were over, the pits were filled up with water and a lake was created. It is now visited by several migratory birds. This is an example of

a. recovery

b. restoration

c. enhancement

d. **replacement**

4 Which of these is correct?

a. The maximum sustainable yield is near the beginning of the sigmoidal curve.

b. **The maximum sustainable yield is near the mid-point of the sigmoidal curve.**

c. The maximum sustainable yield is near the end of the sigmoidal curve.

d. None of these.

5 Which of these is correct?

a. **R + G = M + F**

b. R + M = G + F

c. R + F = M + G

d. R + G + M + F = 0

6 In a logistic growth curve, growth is slow near carrying capacity mainly because the population is:

(a) very small

(b) newly introduced

(c) **close to the environmental limit**

(d) free from competition

7 What does absolute abundance measure?

(a) Relative catch per unit effort

(b) **Actual number of individuals present**

(c) Percentage change in population

(d) Estimated trend in sightings

8 A root zone treatment plant is an example of

a. **phytoremediation**

b. biological control

c. biomagnification

d. bioaccumulation

9 What is a major risk of introducing predators for pest control?

(a) The pest always becomes extinct immediately

(b) The predator cannot reproduce under any condition

(c) The predator reduces rainfall

(d) **The introduced predator may itself become a pest**

10 Ecotoxicology studies toxic chemicals mainly at which broader levels?

(a) Individual atoms and molecules only

(b) **Population, community, ecosystem, and biosphere levels**

(c) Market demand and harvesting cost only

(d) Crop yield and storage levels only
